Payment Outcomes & Failure Causes

Page 1 | Page 2 | Page 3

Payments requested 1 Jul – 28 Sep 2026 · Outcomes as of 29 Sep 2026 00:00 Mogadishu

count_payments	successful_payments	successful_pay%	failed_attempts
100K	84K	84.05%	16579

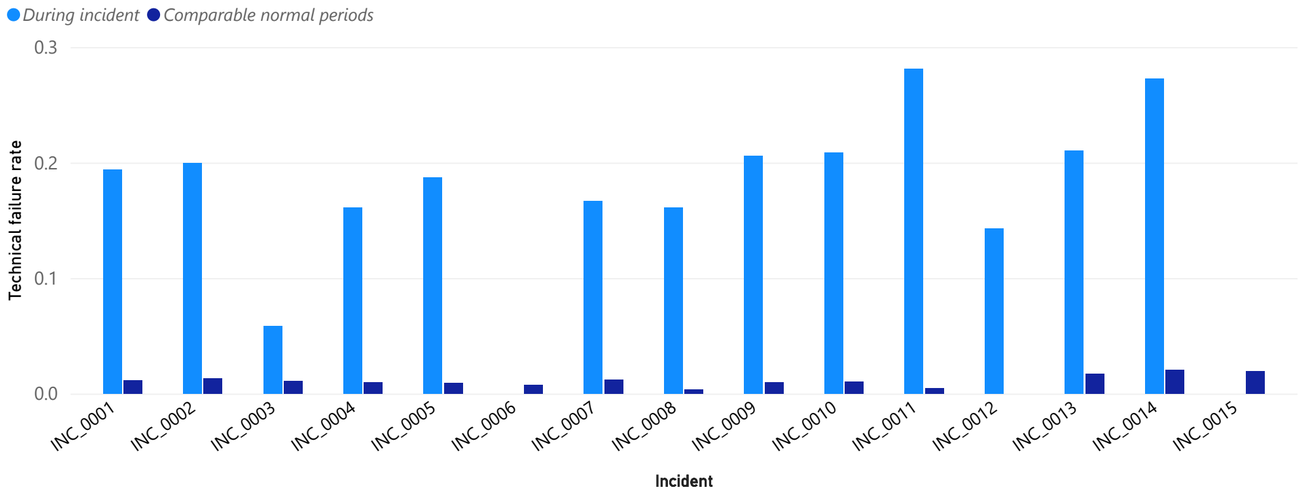

first-failed_payments	retried_payment	recovered_payments	success_among_retried %
16540	740	726	98.11%

Incident_vs_Normal_Ratio
16.18

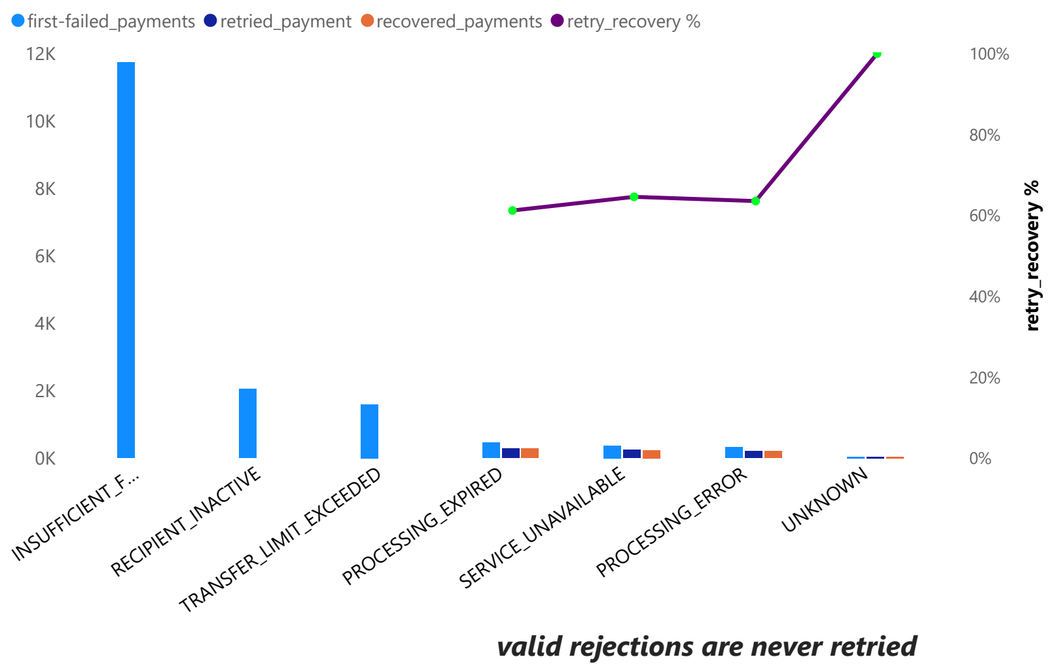

Technical failures are ~16× higher during switch incidents

Technical failure rate: incident windows vs normal periods

Same city/channel, same weekday and local hours on other dates · Association, not cause

Retry recovery by first failure reason

valid rejections are never retried

Final outcome per payment

Retries count once

final_outcome	payments	payment %
SUCCEEDED	84053	84.05%
FAILED	15813	15.81%
PENDING	98	0.10%
UNKNOWN	36	0.04%
Total	**100000**	**100.00%**

Final outcome per attempt

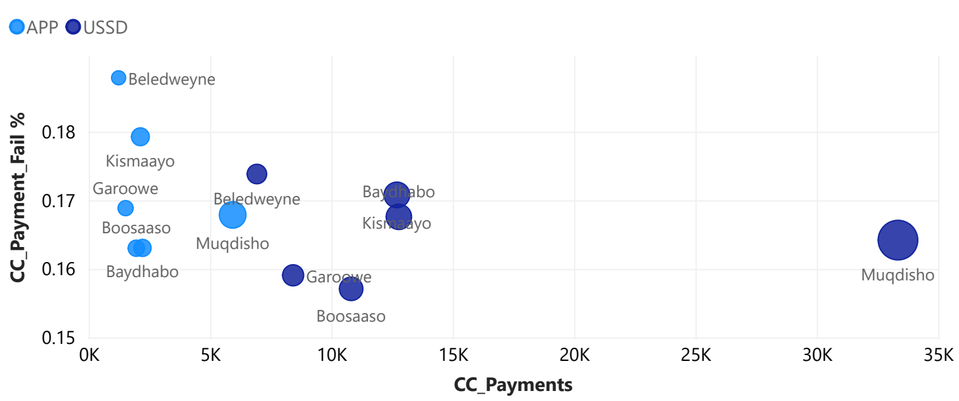

Shows retries

final_outcome	attempts	attempt %
SUCCEEDED	84053	83.41%
FAILED	16579	16.45%
PENDING	98	0.10%
UNKNOWN	36	0.04%
Total	**100766**	**100.00%**

766 retries explain the gap between failed attempts and failed payments.

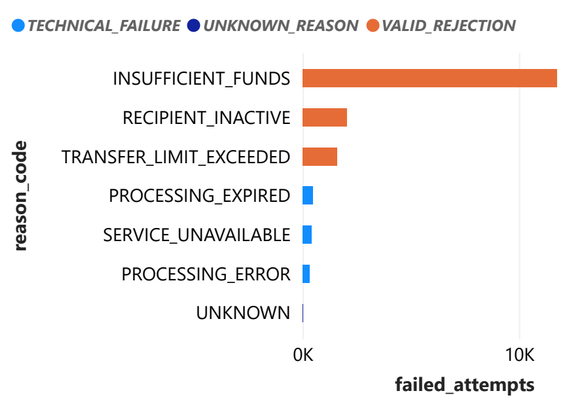

Failure rate vs volume by city and channel

Bubble size = affected senders

Confirmed failed attempts by reason

RESPONSE_TIMEOUT excluded (not a failure

Who confirmed failures affect

Distinct counts overlap across reasons

reason_code	failure_category	failed_attempts	payments_with_failure	affected_senders	requested _USD(attempt-based)	requested_USD(distinct payments)	failed_payments_ultimately_succeeded	%_ultimately_succeeded
INSUFFICIENT_FUNDS	VALID_REJECTION	11739	11739	3233	1,187,172.45	1,187,172.45		0.00%
RECIPIENT_INACTIVE	VALID_REJECTION	2056	2056	1690	88,074.81	88,074.81		0.00%
TRANSFER_LIMIT_EXCEEDED	VALID_REJECTION	1593	1593	1359	1,207,917.98	1,207,917.98		0.00%
PROCESSING_EXPIRED	TECHNICAL_FAILURE	467	465	442	11,902.99	11,883.71	284	61.08%
SERVICE_UNAVAILABLE	TECHNICAL_FAILURE	398	373	355	10,508.64	9,676.75	242	64.88%
PROCESSING_ERROR	TECHNICAL_FAILURE	324	323	312	8,542.38	8,493.74	206	63.78%
UNKNOWN	UNKNOWN_REASON	2	2	2	112.66	112.66	2	100.00%
RESPONSE_TIMEOUT	UNCERTAINTY							0.00%
Total		**16579**	**16540**	**4283**	**2,514,231.91**	**2,513,110.84**	**726**	**4.39%**

Amounts are requested amounts, not losses. Attempt-based sums repeat retried payments; distinct counts overlap across reasons.

Ledger and balance reconciliation

check_name	check_order	records_checked	exception_count	expected_cents	actual_cents	difference_cents	status
Each successful attempt has one balanced debit and credit for the requested amount	1	84053	0				PASS
No ledger postings exist for attempts that did not succeed	2	16713	0				PASS
Every ledger entry belongs to a known attempt	3	168106	0				PASS
Opening balance + ledger movements = closing ledger balance (per wallet)	4	5000	0				PASS
Closing ledger balance = held + available balance (per wallet)	5	5000	0				PASS
Confirmed successful payment volume = debit side of the ledger	6		0	229401071	229401071	0	PASS
Money is conserved: total opening balances = total closing ledger balances	7	5000	0	113707998	113707998	0	PASS

Confirmed successful volume reconciles to the debit side of the wallet ledger

Investigation Queue: the unresolved-attempt queue

Management memo: three investigation priorities

SIM_WALLET · Payments requested 1 Jul – 28 Sep 2026 · Outcomes as of 29 Sep 2026 00:00 Mogadishu time

Summary.
Of **100,000** payments, **84,053 (84.05%)** succeeded, **15,813 (15.81%)** confirmed failed, **98** remain pending and **36** lack final evidence. Most failures are valid rejections (insufficient funds, inactive recipient, over-limit). The issues below concern the technical failures and the unresolved transfers.

# ▲	Problem (evidence)	Affected senders & payments	Amount (labelled)	Recommended investigation	Owner	Follow-up measure
1	Technical failures concentrate in payment-switch incidents: technical failure rate 19% during incidents vs 1% in comparable normal periods, in 13 of 15 incidents	174 technical failures out of 921 attempts during the 15 incident windows	not calculated for incident windows	Review payment-switch behaviour in the incident windows, starting with INC_0011 (largest rate difference)	Payment Engineering	Technical failure rate in incident windows vs comparable periods, per incident
2	Pending transfers hold customer funds for months: 98 attempts pending after RESPONSE_TIMEOUT, oldest about 90 days	98 senders; 98 payments	$2,347.40 held on sender wallets (not a loss)	Confirm the final status of each pending attempt, oldest first (queue ranks 1-98); review whether holds should remain	Payment Operations (with Wallet Reconciliation)	Pending attempts older than 7 days ; total held USD is $2,244.7
3	About 37% of payments hit by a technical failure never succeed: about 1,160 payments, about 730 recovered; PROCESSING_EXPIRED is the largest reason (465 payments, 442 senders)	About 1,100 senders; about 1,160 payments (reasons overlap)	About $30,054 requested (distinct payments, not a loss)	Investigate why processing expires, and why about 430 payments did not complete after a technical failure	Payment Engineering	% of technically failed payments that ultimately succeed (baseline about 63%)
